At CREO Composites, our proprietary EDGE GRATE brand delivers high-performance FRP (Fiber Reinforced Polymer) gratings designed for the most demanding industrial environments. Engineered in collaboration with top-tier manufacturers, our gratings offer exceptional strength, corrosion resistance, and long-term durability, all while meeting international standards such as ASTM D 2583 and BS EN 124:2015.

KEY OFFERINGS

Molded & Pultruded FRP Gratings

Available in multiple sizes, colors, checkered, fire retardant and load-bearing thicknesses to suit every application.

Specialty Resins

Choose from Orthophthalic, Isophthalic, Vinyl Ester, and Phenolic resins tailored for environments with chemical exposure, marine conditions, or fire safety requirements.

Complete Accessory Range

- Hold-Down Clips
- Stair Treads
- Edge Trims
- Handrail Systems
- Installation Support Available

Key Application Sectors

- Chemical & Petrochemical Plants
- Wastewater Treatment Facilities
- Power Plants & Energy Units
- Marine & Offshore Platforms
- Pharmaceutical & Food Processing Units
- General Manufacturing & Assembly Areas
- Bridges, Tunnels & Public Walkways

Why EDGE GRATE?

- ➔ Lightweight yet extremely strong
- ➔ Rust-proof and anti-slip
- ➔ Low maintenance with long service life
- ➔ Flame-retardant and non-conductive options available
- ➔ Fast installation with modular system
